

# 8Nm & 10Nm On/Off, R/L & Mod. Damper Actuators

VA-08 & 10

# Features and Benefits

- Maintenance-free
- Position indication
- Reversible rotation
- Mechanically set rotation limits
- Manual override

# **Technical Overview**

The VA-08 & 10 range of actuators require either a 24Vac/dc or 230Vac supply depending on version ordered. They are available to accept either an on/off/floating (raise/lower) or modulating control signal input. They also have auxiliary switch option.

The direction of rotation can be reversed by a simple selector switch. The actuator is overload-proof, and requires no limit switches and automatically stops when the end stop is reached.

Product Codes	
VA-08A-24	24Vac/dc 8Nm on/off or Floating actuator
VA-08A-24S	24Vac/dc 8Nm on/off or Floating actuator with auxiliary switch
VA-08A-230	230Vac 8Nm on/off or Floating actuator
VA-08A-230S	230Vac 8Nm on/off or Floating actuator with auxiliary switch
VA-10M-24	24Vac/dc 10Nm Modulating actuator
VA-10M-24S	24Vac/dc 10Nm Modulating actuator with auxiliary switch

Power supply:

19-29Vac/dc (24V nominal) VA-x-24 VA-08A-230 85-265Vac (230V nominal)

Max. power consumption:

VA-x-24

Running 2W 1W Stopped VA-08A-230

> Running 1.5W Stopped 1W

Connection Via 1m flying lead (halogen free)

0° - 95° Angle of rotation

Running time

VA-08A-x 60 to 120s / 90° VA-08M-24 <150s / 90°

Damper coupling:

Square 8-12mm Round 8-16mm

Up to approx. 1.6m<sup>2</sup> Damper size Protection IP54 (cable downwards) Aux. switch rating SPDT 5(2.5)A @250Vac Service life >60000 cycles (0°-95°-0°)

Ambient:

-20 to +50°C Temperature RH5 to 95% RH

Protection class

VA-x-24 Ш VA-08A-230 Ш Conformity CE

Country of origin Germany

Conformity\* EMC, LVD, CE & UKCA Marked Conformity EMC, CE & UKCA Marked

<sup>\*</sup> Actuators with auxiliary switch only

At the end of the products useful life please dispose as per the local regulations.

Do not dispose of with normal household waste

# VA-08 & 10 8Nm & 10Nm On/Off, R/L & Mod. Damper Actuators

ue Number 7.1

### Installation

- 1. Ensure that all power is disconnected before carrying out any work on the damper actuator.
- 2. Attach the actuator to the damper spindle, finger tighten the nuts on the V-clamp.
- 3. Fix the anti-rotation device to the back of the actuator. This is supplied connected to the back of the housing, to release simply buckle.
- 4. Move the damper to the closed position. Using the manual override push button, turn the clamp until the actuator is in the correct position and tighten the V-clamp.
- 5. If the damper has no fixed stops of its own, the angle of rotation / working range can be adjusted mechanically by re-positioning the adjustable stops.
- 6. Terminate the cores of the flying lead as required and ensure that the voltage is within the specified tolerances.

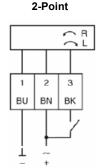

# **Operating Modes & Connections**

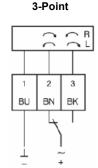

#### 2-Point

Through connecting the power supply to BU+BN (1+2) and the direction of rotation switch on position "R" moves the actuator to position 1. Is also BK (1+2+3) connected to the power supply the actuator is moving to position 0.

#### 3-point

Through connecting the power supply to BU+BN (1+2) and the direction of rotation switch on position "R" moves the actuator to position 1. If the power supply is interrupted the actuator maintains its current position. Is also BU+BK (1+3) connected to the power supply the actuator is moving in direction 0

# Rotary direction switch

R= clockwise Adp= adaption L= counter clockwise

# Modulating

Through connecting the power supply to BU+BN (1+2) and a reference signal Y to BK (3) of 0(2)...10Vdc, moves the actuator to its specified position. The actual damper position 0...100% is a feedback signal U for example to share the signal with other actuators.

## Mode-switch

Mode-switch with five positions at the housing

Rotary direction right 2-10V

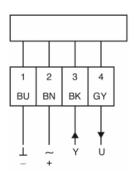

Rotary direction right 0-10V

Adp = Adaption

Rotary direction left 2-10V

Rotary direction left 0-10V
